# **BE THE NEXT**

Shinhan will be the "Future of Finance," becoming the standard in the digital age through 24-hour connectivity with the lives of our customers and providing differentiated solutions beyond finance. We are going forward as the dominant leader in the market as we shape the future of business.

# Breaking the barriers for breakthrougn in finance

We are constantly developing ourselves further in order to seize new opportunities – and yet always remaining true to our principles. In 2021, despite the challenges posed by the prolonged COVID-19 pandemic,we achieved a record-breaking performance, while also continuing our journey driven by our mission of "Building a Better World through Finance." And now we are well positioned to take new challenges with "Breakthrough" as our strategic keyword for the years ahead.

# Message from the CEO

# MESSAGE FROM THE CEO

Dear Valued Customer,

It gives me immense pleasure to present you the overview of SBC Bank's performance, substantial achievements and initiatives taken during the year of 2021. The prolonged COVID-19 pandemic in 2021 was a challenging year for the world and Cambodia without exception, especially the community outbreak event in February 20. The success of government's vaccination program has brought us more hopes and opportunities as more than 80 percent of Cambodian people received at least two doses of covid-19 vaccines allowing the relaxation of travel restriction and making the country to reopen for its economic recovery.

In 2021, we were able to deliver outstanding performance results with a significant increase of net profit by 51%, which is about US\$ 6.2 Million higher than the prior year balance. The main reason of this high record of profit was due to the consistent growth of the net interest income amounting to US\$ 34.94 Million, which is about 44% increase compared to 2020. From the balance sheet side, our total asset recorded US\$ 719 Million, an increase of 19% compared to previous year at US\$ 606 Million, mainly driven from the grow of deposit together with the loan and advance to customers. With a well-managed and robust credit portfolio, our loans and advances grew by 28% to US\$ 561 Million versus prior year at US\$ 437 Million, contributed mainly by sustained growth of retail loan segment. Customer deposit also continued to increase, with significant growth of approximately US\$ 21 Million bringing the balance as of 2021 to US\$175 Million, an increase of 14% compared to 2020. In addition, as the end of March 2022, we expanded branch channels to 12 branches to enable our customers experiencing the bank's services at their own convenience location.

Our loyalty customers and employees are behind of these achievements and result. Therefore, it's all thank to valued customers who always support and care about Shinhan Bank Cambodia, and also our employees who dedicated their effort and cooperation both hearts and souls to provide our customers with excellent value by upholding our bank's core values "customer-oriented" in mind.

I would like to thank you for your continuing trust and support for Shinhan Bank Cambodia, and I look forward to what we will achieve together in the year ahead.

Kim Nam Sco

Shinhan Bank (Cambodia) PLC. President & Chief Executive Officer **Mr. Kim Nam Soo** 

Thank you

# About Shinhan Bank (Cambodia) PLC.

# WE CREATE THE FUTURE OF FINANCE THROUGH INNOVATION

Shinhan Bank has been pioneering the future of finance in Cambodia as the "First Mover" leading the market, rather than being one of "Fast Followers" that struggle to catch up with new products and technologies.

We will never be satisfied with the current financial business in which FinTech is tearing down conventional boundaries. Instead, we will continue to realize innovations as we rise up to challenge to offer new and futuristic services.

#### Report of the Directors

The Directors have pleasure in submitting their report together with the audited financial statements of Shinhan Bank (Cambodia) Plc. ('the Bank') for the year ended 31 December 2021.

#### Principal activities

The Bank is principally engaged in all aspects of banking business and the provision of related financial services.

There were no significant changes to these principal activities during the financial year.

#### Financial results

The financial results of the Bank for the year ended 31 December 2021 were as follows:

|                          | 2021<br>US\$                  | 2020<br>US\$                       | 2021<br>#2:67:000<br>(Note 5)   | 2020<br>K0-87000<br>(Note 5)        |

#### Dividends

No dividend was declared or paid, and the Directors does not recommend any dividend to be paid for the financial year (2020: Nil).

#### Share capital

There was no changes in the share capital during the financial year.

#### Reserves and provisions

There were no other movements to or from reserves and provisions during the financial year other than those disclosed in the financial statements.

#### Written off and allowance for financial assets

Before the financial statements were prepared, the Directors took reasonable steps to ascertain that action had been taken in relation to write off of financial assets that have no reasonable expectations of recovering the contradual cash flows in their entirety or a portion thereof and making of allowance for expected credit losses ("ECL") on financial assets, and satisfied themselves that all known financial assets that have no reasonable expectations of recovering the contractual cash flows were written off and that adequate allowance for ECL on financial assets have been made.

At the date of this report, the Directors are not aware of any circumstances which would render the amount of the allowance for expected credit losses on financial assets in the financial statements of the Bank. inadequate to any material extent.

#### Assets

Before the financial statements of the Bank were prepared, the Directors took reasonable steps to ensure that any assets, other than debts, which were unlikely to be realised in the ordinary course of business at their value as shown in the accounting records of the Bank had been written down to an amount which they might be expected to realise.

At the date of this report, the Directors are not aware of any circumstances, which would render the values attributed to the assets in the financial statements of the Bank misleading.

#### Valuation methods

At the date of this report, the Directors are not aware of any circumstances which have arisen which render adherence to the existing method of valuation of assets and liabilities in the financial statements of the Bank misleading or inappropriate.

#### Contingent and other liabilities

At the date of this report, there does not exist.

- (a) any charge on the assets of the Bank which has arisen since the end of the financial year which secures the liabilities of any other person, or
- (b) any contingent liability in respect of the Bank that has arisen since the end of the financial year other than in the ordinary course of banking business.

No contingent or other liability of the Bank has become enforceable or is likely to become enforceable within the period of twelve months after the end of the financial year which, in the opinion of the Directors. will or may substantially affect the ability of the Bank to meet its obligations as and when they fail due.

#### Change of circumstances

At the date of this report, the Directors are not aware of any circumstances, not otherwise dealt with in this report or the financial statements of the Bank, which would render any amount stated in the financial statements misleading.

#### Items of unusual nature

The results of the operations of the Bank for the financial year were not, in the opinion of the Management. substantially affected by any item, transaction or event of a material and unusual nature, except for:

#### Covid-19 and its impact on ECL

The ECL was estimated based on a range of forecast economic conditions as at reporting date. The Novel Coronavirus (Covid-19) outbreak has spread across the world including Cambodia and beyond. causing disruption to business and economic activity. The impact on GDP and other key indicators has been considered when determining the severity and likelihood of downside economic scenarios that are used to estimate ECL in which the calculation of the ECL in this current environment is subject to significant uncertainty. Management provides its best estimate on the possible outcomes of Covid-19 on the Bank, however, this estimate may move materially as events unfold.

There has not arisen in the interval between the end of the financial year and the date of this report any . item, transaction or event of a material and unusual nature likely, in the opinion of the Directors, to affect substantially the results of the operations of the Bank for the current year in which this report is made.

#### Board of Directors

The Directors who served during the year and at the date of this report are:

| Mr. Seo Seung Hyeon | Chairman   |
|---------------------|--|
| Mr. Kim Nam Soo     | Director (appointed on 13 January 2021)              |
| Mr. Kim Choon Ho    | Director   |
| Mr. Lee Sanghoon    | Director   |
| Mr. Lee Dae Kun     | Director (appointed on 1 September 2021)             |
| Mr. Choi Du Yeon    | Independent director (resigned on 27 May 2021)       |
| Mr. Kim Yuk Dong    | Independent director                                 |
| Mr. Park WooGyun    | Independent director (appointed on 1 September 2021) |

#### Directors' interests

None of the Directors held or dealt directly in the shares of the Bank during the financial year.

#### Directors' benefits

During and at the end of the financial year, no arrangements existed to which the Bank is a party with the object of enabling Directors of the Bank to acquire benefits by means of the acquisition of shares in or debentures of the Bank or any other body corporate.

During the financial year, no Director of the Bank has received or become entitled to receive any benefit (other than a benefit included in the aggregate amount of emoluments received or due and receivable by the Directors as disclosed in the financial statements) by reason of a contract made by the Bank or a related corporation with a firm of which the Director is a member, or with a company in which the Director has a substantial financial interest other than as disclosed in the financial statements.

#### Directors' responsibility in respect of the financial statements

The Directors are responsible for ascertaining that the financial statements present fairty, in all material respects, the financial position of the Bank as at 31 December 2021, and its financial performance and its cash flows for the year then ended. In preparing these financial statements, the Directors is required to:

- adopt appropriate accounting policies which are supported by reasonable and prudent judgments. 65 and estimates and then apply them consistently.
- comply with Cambodian International Financial Reporting Standards ("CIFRSs") or, if there have (B) been any departures in the interest of true and fair presentation, ensure that these have been appropriately disclosed, explained and quantified in the financial statements:
- (ii) oversee the Bank's financial reporting process and maintain adequate accounting records and an effective system of internal controls;
- (iv) assess the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so; and
- (v) control and direct effectively the Bank in all material decisions affecting the operations and performance and ascertain that such have been properly reflected in the financial statements.

The Directors confirms that they have complied with the above requirements in preparing the financial statements.

#### Approval of the financial statements

We, hereby approve the accompanying financial statements together with the notes thereto as set out on pages 9 to 100 which, in our opinion, present fairly, in all material respects, the financial position of the Bank as at 31 December 2021, and its financial performance and its cash flows for the year then ended, in accordance with CIFRSs.

Signed in accordance with a resolution of the Board of Directors,

#### Report of the Independent Auditors To the shareholders of Shinhan Bank (Cambodia) Plc.

#### Opinion

We have audited the financial statements of Shinhan Bank (Cambodia) Plc. ('the Bank'), which comprise the statement of financial position as at 31 December 2021, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information (hereafter referred to as 'the financial statements') as set out on pages 9 to 100.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at 31 December 2021, and its financial performance and its cash flows for the year then ended in accordance with Cambodian International Financial Reporting Standards ("CIFRSs").

#### Basis for Opinion

We conducted our audit in accordance with Cambodian International Standards on Auditing ('CISAs'). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the ethical requirements that are relevant to our audit of the financial statements in Cambodia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Other Information

Management is responsible for the other information. The other information comprises the Report of the Directors on pages 1 to 5, and the annual report, which is expected to be made available to us after that date. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

4PAL: Contraction on a Darborous stright statute please straight with the straight in terms of the PALS (PALS) gives approximate of traight-state surveys letter allowed and PERS becomes constitute another tragent derivative model to particular. Why high states of

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with CIFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

#### Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with CISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the appregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material mastatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit. procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of
  accounting and, based on the audit evidence obtained, whether a material uncertainty exists
  related to events or conditions that may cast significant doubt on the Bank's ability to continue
  as a going concern. If we conclude that a material uncertainty exists, we are required to draw
  attention in our auditors' report to the related disclosures in the financial statements or, if such
  disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit
  evidence obtained up to the date of our auditors' report. However, future events or conditions
  may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### **Reporting entity** 1.

Shinhan Bank (Cambodia) Plc. (previously known as Shinhan Khmer Bank Plc.) (the "Bank") was incorporated in the Kingdom of Cambodia on 27 June 2007 under Registration No. 00006043 issued by the Ministry of Commerce and officially commenced its operations on 15 October 2007. On 24 February 2009, the Bank was granted a permanent banking licence No. 017 from the National Bank of Cambodia ("NBC").

The registered address of the Bank is located at Vanda Tower No. 79, Kampuchea Krom Blvd, Sangkat Monourom, Khan 7 Makara, Phnom Penh, Kingdom of Cambodia.

The Bank is a subsidiary of Shinhan Bank Co., Ltd., a Bank incorporated in Korea.

The Bank is principally engaged in the operation of core banking business and the provision of related financial services.

As at 31 December 2021, the Bank had 402 employees (31 December 2020: 345 employees).

#### 2. Basis of accounting

The financial statements of the Bank have been prepared in accordance with the Cambodian International Financial Reporting Standards ("CIFRSs").

The accounting policies and methods of computation have been applied consistently to all periods presented in these financial statements, except if mentioned otherwise (Note 35).

Details of the Bank's significant accounting policies are included in Note 34.

These financial statements of the Bank were authorised for issue by the Board of Directors on 31 March 2022.

#### 3. Functional and presentation currency

The Bank transacts its business and maintains its accounting records in United States Dollars ("US\$"). Management has determined the US\$ to be the Bank's functional and presentation currency as it reflects the economic substance of the underlying events and circumstances of the Bank.

These financial statements are presented in US\$, which is the Bank's functional currency. All US\$ amounts have been rounded to the nearest dollars. unless otherwise indicated.

#### Notes to the financial statements (continued) for the year ended 31 December 2021

#### 4. Use of judgments and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Bank's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

#### Judgements Α.

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

- Note 34C(ii): classification of financial assets: assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are SPPI on the principal amount outstanding.
- Note 34C(vii): establishing the criteria for determining whether credit risk on the financial asset has increased significantly since initial recognition, determining methodology for incorporating forward-looking information into measurement of ECL and selection and approval of models used to measure ECL.

#### В. Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year are included in the following notes:

- Note 34C(vii): impairment of financial instruments: determining inputs into the ECL measurement model, including incorporation of forward-looking information.
- Note 34C(vii): impairment of financial instruments: key assumptions used in estimating recoverable cash flows.
- Note 34C(vi): determination of the fair value of financial instruments with significant unobservable inputs.

#### Notes to the financial statements (continued) for the year ended 31 December 2021

#### 5. Translation of United States Dollars into Khmer Riel

The financial statements are expressed in United States Dollars ("US\$") which is the Bank's functional currency. The translations of US\$ amounts into Khmer Riel ("KHR") meets the presentation requirements pursuant to Law on Accounting and Auditing and has been done in compliance with CIAS21 - The Effects of Changes in Foreign Exchange Rates.

Assets and liabilities are translated at the closing rate as at the reporting date and share capital and other equity accounts are translated at the historical rate. The statements of profit or loss and other comprehensive income and cash flows are translated into KHR at the average rate for the year, which has been deemed to approximate the exchange rate at the date of transaction as exchange rates have not fluctuated significantly during the period. Exchange differences arising from the translation are recognised as "Currency Translation Differences" in other comprehensive income.

The Bank uses the following exchange rates:

|                  |       |   | Closing<br>rate | Average   |
|------------------|-------|---|-----------------|-----------|
| 31 December 2021 | US\$1 | = | KHR 4,074       | KHR 4,068 |
| 31 December 2020 | US\$1 | = | KHR 4,045       | KHR 4,077 |

These convenience translations should not be construed as representations that the United States Dollars amounts have been, could have been, or could in the future be, converted into Khmer Riels at this or any other rate of exchange.

#### Α. Capital guarantee deposit

Under the NBC's Prakas No. B7-01-136 dated 15 October 2001, the Bank is required to maintain a statutory deposit 10% of its capital. This deposit is not available for use in the Bank's day-to-day operations and is refundable should the Bank voluntarily cease its operations in Cambodia. Capital guarantee deposit bear interest at a rate of 0.06% (2020: 0.06%) per annum.

#### Notes to the financial statements (continued) for the year ended 31 December 2021

#### 8. Statutory deposits (continued)

#### Β. Reserve requirements on customers' deposits and other banks' deposits

This is a reserve requirement which fluctuates depending on the level of the Bank's customers' deposits and other banks' deposits. It is maintained in compliance with the National Bank of Cambodia's Prakas No. B7-012-140 dated 27 September 2012 at the rates of 8.00% of daily average deposits from customers and other banks in KHR and 12.50% in currency other than KHR and bear no interest effective from 29 August 2018.

The National Bank of Cambodia ("NBC") issued a Prakas dated 18 March 2020 announcing the reduction of the Reserve Requirements Rate ("RRR") on KHR and foreign currencies to 7%.

This represents provision for seniority indemnity payments required by Prakas No. 443 issued by the Ministry of Labour and Vocational Training ("MoLVT") on 21 September 2018, and subsequently amended by the Instruction No. 042/19 dated 22 March 2019. It requires all employers to settle the seniority indemnity to their employee as follows:

- Current pay: starting from 2019 onwards at the amounts equal to 15 days of wages and other benefits per year.
- Retrospective (back-pay): starting from the end of 2021 onwards at the amounts equal to 6 days of • net wages per year. The provision of back-pay seniority indemnity is calculated at a maximum amount of 6 months net wages (depends on the length of the service employee served) to the employee who has seniority before 2019.

#### Notes to the financial statements (continued) for the year ended 31 December 2021

#### 20. Provision for employee benefits (continued)

Payments will be made twice a year, in June and December respectively. Employee does not entitle to the remaining back-pay seniority indemnity which is not yet due, if he/she resigns from the Bank.

On 2 June 2020, the MoLVT issued Prakas No. 018/20 for the postponement of seniority indemnity back-pay for periods before 2019 and postponement of seniority indemnity current pay in 2020. Under this new measure, both the issuance of seniority indemnity back-pay for periods before 2019, and the issuance of seniority indemnity current pay for 2020 are to be paid in 2022. The Bank chose to pay the current pay in each year and deferred the back pay to June 2022.

#### Notes to the financial statements (continued) for the year ended 31 December 2021

#### 30. Commitments and contingencies (continued)

#### С. Tax contingencies (continued)

#### Fiscal year 2010 – 2012 (comprehensive tax audit)

On 4 July 2017, the Bank received tax reassessment letter from comprehensive tax auditor imposing underpayment of taxes amounting to KHR2,246,240 thousand (approximate to US\$561,560). On 14 August 2017, the Bank filed the tax administrative protest letter to the GDT protesting to the reassessed taxes. On 11 November 2020, the Bank received a response letter from the GDT on the imposed of revised tax reassessment for the fiscal years 2010, 2011 and 2012 amounting to KHR311,530 thousand (approximate to US\$77,883). Subsequently, the Bank filed second administrative protest letter to the GDT to protest to the 2nd reassessment letter on 18 December 2020.

On 5 January 2022, the Bank has fully paid its tax liabilities, mentioned above to the GDT amounting to KHR283,360,579 (approximate to US\$70,000).

#### Fiscal year 2015 (limited tax audit)

On 13 March 2017, the Bank received tax reassessment letter from limited tax auditor imposing underpayment of taxes amounting to KHR614,544 thousand (approximate to US\$150,845). On 21 April 2017, the Bank filed the tax administrative protest letter to the GDT protesting to the reassessed taxes.

The tax reassessment balance has not been recorded in the financial statements as the Bank believes that there are reasonable grounds to challenge the assessment as stated in the tax law and regulations as well as industry practices, as indicated in its objection letter.

#### Fiscal year 2019 – 2020 (limited tax audit)

On 3 May 2021, the Bank received tax reassessment letter from limited tax audit period from 1 January 2019 to 30 April 2020 imposing underpayment of taxes amounting to KHR69,450,852 (approximately US\$17,047). On 21 June 2021, the Bank filed the tax administrative protest letter to the GDT protesting to the reassessed taxes.

The tax reassessment balance has not been recorded in the financial statements as the Bank believes that there are reasonable grounds to challenge the assessment as stated in the tax law and regulations as well as industry practices, as indicated in its objection letter.

#### Notes to the financial statements (continued) for the year ended 31 December 2021

#### 30. Commitments and contingencies (continued)

#### С. Tax contingencies (continued)

#### Fiscal year 2019 – 2020 (comprehensive tax audit)

On 8 April 2021, the Bank received a tax notification letter from the GDT for the purpose of conducting a comprehensive tax audit for the period from 1 January 2019 to 31 December 2020. As of the date of this report, the Bank has not received any result from the GDT yet.

The tax returns of the Bank are subject to periodic examination by the tax authorities. As the application of tax laws and regulations to various types of transactions is susceptible to varying interpretations, amounts reported in the financial statements of the Bank could be changed at a later date, upon final determination by the tax authorities.

#### 31. Related parties

#### Α. Identity of related party

For the purposes of these financial statements, parties are considered to be related to the Bank if the Bank has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Bank and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

The Bank have related party relationships with its substantial shareholders, companies in common control and key management personnel.

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Bank either directly or indirectly. The key management personnel include all the Directors of the Bank, and certain senior management members of the Bank.

Key management have banking relationships with Bank entities which are entered into in the normal course of business and on substantially the same terms, including interest rates and security, as for comparable transactions with other persons of a similar standing or, where applicable, with other employees. These transactions did not involve more than the normal risk of repayment or present other unfavourable features.

# Borrowings from related parties

The balance of borrowings from related parties are disclosed in Note 17.

# 32. Financial risk management

#### Α. Introduction and overview

The Bank has exposure to the following risks from financial instruments:

- credit risk; •
- market risk;
- liquidity risk; and •
- operational risk. •

This note presents information about the Bank's exposure to each of the above risks, the Bank's objectives, policies and processes for measuring and managing risk, and the Bank's management of capital.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### Introduction and overview (continued) Α.

For the purpose of preserving the financial stability and reduce the burden of the borrowers who are losing their primary incomes and facing difficulties in repayment during the impact of the COVID-19 pandemic, the Bank works constructively with affected borrowers and allows for loan restructuring. Loan restructuring is proposed by the relationship team and approved by the Bank's Risk Department, which shall regularly conduct a portfolio review of affected borrowers to measure the impact on their financial conditions during the pandemic.

# Risk management functional and governance structure

The Bank does not use derivative financial instruments such as foreign exchange contract and interest rate swaps to manage its risk exposures.

The Board of Directors have overall responsibility for the establishment and oversight of the Bank's risk management. The Board of Directors have established the Audit Committee and Risk Management Committee which are responsible for developing and monitoring Bank risk management policies in their specified areas. All Board committees have both executive and nonexecutive members and report regularly to the Board of Directors on their activities.

The Risk Management Committee was established to assist the Board of Directors in its role and responsibilities over risk management and compliance of the Bank relating to risks in business operations and risk monitoring process. These include risk identification, risk management, risk monitoring and effective compliance with laws and regulations in accordance with the Bank's risk management policies approved by the Board of Directors. The Risk Management Committee also assist the Board of Directors to ensure that policies, charters and guidelines are in place in order to assess, evaluate and mitigate the risks pertaining to new products/new activities to be introduced. The Risk Management and Compliance Department plays an important role on a day-to-day basis in assisting the Risk Management and Compliance Committee to monitor the potential risks associated with the operations of the Bank and its branches and compliance controls of the Bank to meet the requirements of laws and regulations including laws and Prakas on Anti-Money Laundering and Combating the Financing of Terrorism set out by the NBC.

The Audit Committee is assisted in these functions by Internal Audit. Internal Audit undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee. In addition, the Audit Committee monitors and evaluates the efficiency of the management structure, policies and procedures, activities and operations of the Bank as well as compliance with laws and regulations.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### B. Credit risk

'Credit risk' is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Bank's loans and advances to customers and other banks, and investment debt securities. For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure - e.g. individual obligor default risk, country and sector risk.

Credit risk is the potential loss of revenue and principal losses arising mainly from loans and advances and loan commitments as a result of default by the borrowers or counterparties through its lending activities.

#### (i). Management of credit risk

The lending activities are guided by the Bank's credit policy to ensure that the overall objectives in the area of lending are achieved; i.e., that the loan portfolio is strong and healthy, and credit risks are well diversified. The credit policy documents the lending policy, collateral policy and credit approval processes, including the Bank's own internal credit risk rating system, and procedures implemented to ensure compliance with NBC Guidelines.

The Bank has established the Core Credit Risk Policy which is designed to govern the Bank's risk undertaking activities. Extension of credit is governed by credit programs that set out the plan for a particular product or portfolio, including the target market, terms and conditions, documentation and procedures under which a credit product will be offered and measured.

Credit risk ratings are reviewed and updated on an annual basis, and in events of (i) change of loan terms and conditions including extension; (ii) repayment irregularities or delinguencies and (iii) adverse information relating to the borrower or transaction.

#### Risk limit control and mitigation policies *(ii)*.

The Bank operates and provides loans to individuals or enterprises within the Kingdom of Cambodia. The Bank manages limits and controls concentration of credit risk whenever they are identified. Large exposure is defined by the NBC as overall credit exposure to any individual beneficiary which exceeds 10% of the Bank's net worth.

The Bank is required, unless prior approval from the NBC is obtained, under the conditions of Prakas No. B7-06-226 of the NBC to maintain at all times a maximum ratio of 20% between the Bank's overall credit exposure to any individual beneficiary and the Bank's net worth. The aggregation of large credit exposure must not exceed 300% of the Bank's net worth.

#### Global Network

# Shinhan Bank (Cambodia) Plc.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### Β. Credit risk (continued)

#### Risk limit control and mitigation policies (continued) *(ii)*.

To manage the exposure risk, the Bank has closely monitored on large credits, impaired credits and the overall level of provisioning on a regular basis and upon requested by the Risk Management Committee. To protect the Bank from the non-compliance on the large exposure, the Board of Directors adopted the alert limits of 15% for single borrower and 250% for the aggregation of the large credit exposure.

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security in the form of collateral for loans to customers, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral. The principal collateral types to secure for loans to customers are:

- Hypothec/mortgages over residential and business properties (land, buildings and other properties); and
- Cash in the form of fixed and margin deposits.

#### *(iii)*. Concentration of risk

The Board of Directors created the Bank Credit Committee for the oversight of credit risk. A separate Bank Credit department, reporting to the Bank Credit Committee, is responsible for managing the Bank's credit risk, including the following.

The following table presents the Bank's maximum exposure to credit risk of on-balance sheet and off-balance sheet financial instruments, without taking into account of any collateral held or other credit enhancements. For on-balance sheet assets, the exposure to credit risk equals their carrying amount. For contingent liabilities, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the obligations of the instruments issued are called upon. For credit commitments, the maximum exposure to credit risk is the full amount of the undrawn credit facilities granted to customers.

- (\*) A "large exposure" is defined under the NBC's Prakas as the overall gross exposure of the aggregate balance of loans and advances with one single beneficiary, which exceeds 10% of the Bank's net worth. The exposure is the higher of the outstanding loans or commitments and the authorised loans or commitments.
- (\*\*) A "restructured loan" is a loan that original contractual terms have been modified to provide for concessions for the borrowers for reasons related to real temporary financial difficulties.

# 32. Financial risk management (continued)

#### Β. Credit risk (continued)

# (iv). Collateral

Whilst the Bank's maximum exposure to credit risk is the carrying amount of the assets or, in the case of off-balance sheet instruments, the amount guaranteed, committed, accepted or endorsed, the likely exposure may be lower due to offsetting collateral, credit guarantees and other actions taken to mitigate the Bank's exposure.

The description of collateral for each class of financial asset is set out below.

# Cash equivalents with other banks, balances with NBC, placements with other banks, debt investments and other assets

Collateral is generally not sought for these assets.

# Loans and advances to customers, contingent liabilities and commitments

Certain Loans and advances to customers, contingent liabilities and commitments are typically collateralised to a substantial extent. In particular, residential mortgage exposures are generally fully secured by residential properties.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### Β. Credit risk (continued)

#### Credit quality of gross Loans and advances to customers (V).

Pursuant to the NBC guideline Prakas B7-017-344, it has defined each credit grading according to its credit quality as follows:

# Normal

Outstanding facility is repaid on timely manner and is not in doubt for the future repayment. Repayment is steadily made according with the contractual terms and the facility does not exhibit any potential weakness in repayment capability, business, cash flow and financial position of the counterparty.

# Special mention

A facility in this class is currently protected and may not be past due but it exhibits potential weaknesses that may adversely affect repayment of the counterparty at the future date, if not corrected in a timely manner, and close attention by the Institution.

Weaknesses include but are not limited to a declining trend in the business operations of the counterparty or in its financial position, and adverse economic and market conditions that all might affect its profitability and its future repayment capacity, or deteriorating conditions on the collateral. This class has clearly its own rational and should not be used as a compromise between Normal and Substandard.

# Substandard

A facility ranked in this class exhibits noticeable weakness and is not adequately protected by the current business or financial position and repayment capacity of the counterparty. In essence, the primary source of repayment is not sufficient to service the debt, not taking into account the income from secondary sources such as the realization of the collateral.

Factors leading to a substandard classification include:

- Inability of the counterparty to meet the contractual repayments' terms,
- Unfavourable economic and market conditions that would adversely affect the business and profitability of the counterparty in the future,
- Weakened financial condition and/or inability of the counterparty to generate enough cash flow to service the payments,
- Difficulties experienced by the counterparty in repaying other facilities granted by the Institution or by other institutions when the information is available, and
- Breach of financial covenants by the counterparty.

#### Global Network

# Shinhan Bank (Cambodia) Plc.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### Β. Credit risk (continued)

#### Credit guality of gross Loans and advances to customers (continued) (V).

# Doubtful

A facility classified in this category exhibits more severe weaknesses than one classified Substandard such that its full collection on the basis of existing facts, conditions or collateral value is highly questionable or improbable. The prospect of loss is high, even if the exact amount remains undetermined for now.

# Loss

A facility is classified Loss when it is not collectable, and little or nothing can be done to recover the outstanding amount from the counterparty.

### **Restructured loans**

National Bank of Cambodia has issued a circular on loan restructuring during Covid-19 outbreak which requires the institutions to work constructively with affected borrowers and allows for loan restructuring for priority sectors. As a result, the Bank has provided a restructuring loan amounting to US\$25,616,523 (2020: US\$19,864,250) and the restructured loans will be downgraded the staging if the borrower's credit risk has increase significantly. Refer to Note 34(F) for details policy.

# Recognition of ECL

The Bank apply a three-Stage approach based on the change in credit quality since initial recognition:

| 3-Stage approach                        | Stage 1                                   | Stage 2                                | Stage 3                            |
|---|---|--|------------------------------------|
|   | Performing                                | Underperforming                        | Nonperforming                      |
| Recognition of expected credit losses   | 12 months expected credit losses          | Lifetime expected<br>credit losses     | Lifetime expected<br>credit losses |
| Criterion                               | No significant increase in<br>credit risk | Credit risk increased<br>significantly | Credit impaired assets             |
| Basic of calculation of interest income | On gross carrying amounts                 | On gross carrying amounts              | On net carrying amounts            |

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

B. Credit risk (continued)

#### (V). Credit quality of gross Loans and advances to customers (continued)

# Recognition of ECL(continued)

The Bank will measure ECL by using the general approach. The general approach consists of segregating the customers into three different Stages according to the staging criteria by assessing the credit risk. 12-month ECL will be computed for Stage 1, while lifetime ECL will be computed for Stage 2 and Stage 3. At each reporting date, the Bank will assess credit risk of each account as compared to the risk level at origination date.

# Long-term facilities (more than one year)

| Stages | Credit Risk Status                     | Grades          | DPD                       | Default Indicator |
|--------|--|-----------------|---------------------------|-------------------|
| 1      | No significant increase in credit risk | Normal          | $0 \le \text{DPD} < 30$   | Performing        |
| 2      | Credit risk increased significantly    | Special Mention | $30 \leq \text{DPD} < 90$ | Under-performing  |
|        |  | Substandard     | 90 ≤ DPD < 180            |                   |
| 3      | Credit impaired assets                 | Doubtful        | 180 ≤ DPD <360            | Non-performing    |
|        |  | Loss            | DPD ≥ 360                 |                   |

# Short-term facilities (one year or less)

| Stages | Credit Risk Status                     | Grades          | DPD                 | Default Indicator |
|--------|--|-----------------|---------------------|-------------------|
| 1      | No significant increase in credit risk | Normal          | $0 \le DPD \le 14$  | Performing        |
| 2      | Credit risk increased significantly    | Special Mention | 15 ≤ DPD ≤ 30       | Under-performing  |
|        |  | Substandard     | 31 ≤ DPD ≤ 60       |                   |
| 3      | Credit impaired assets                 | Doubtful        | $61 \le DPD \le 90$ | Non-performing    |
|        |  | Loss            | DPD ≥ 91            |                   |

#### (V). Credit quality of gross Loans and advances to customers (continued)

# Recognition of ECL (continued)

The Bank will use the day past due ("DPD") information and NBC's classification for staging criteria. Also, the Bank will incorporate credit scoring or more forward looking elements in the future when information is more readily available. Upon the implementation of credit scoring system, it the risk level drops by two or more notches as compared to the risk level at origination, the accounts have to be classified under Stage 2.

As for financial assets that are short term in nature, simplified approach will be adopted where no staging criteria is required. In this case, it will be either performing (Stage1) or non-performing.

The table below summarises the credit quality of the Bank's gross financing according to the above classifications.

|  |                 | 31 Decen        | nber 2021       |               |

# Incorporation of forward-looking information

The Bank incorporates forward-looking information into both the assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and the measurement of ECL.

External information considered includes economic data and forecasts published by governmental bodies and monetary authorities in the countries where the Bank operates, supranational organisations such as the World Bank, and selected private-sector and academic forecasters.

For commercial loan portfolio, an internal rating model developed by Shinhan Bank Korea has been used. Shinhan Bank Korea used the actual 1-year PD for the calculation of provisional loss based on the ECL. Forward looking macroeconomic factors have been incorporated within this model. The probability of default corresponding to maturity of each rating is estimated for 10 years under the assumption of Weibull distribution. In order to apply Shinhan Bank's CIFRS Corporate PD with adjustment, 9 years of data for NPL ratio are acquired for both Cambodia and South Korea and multiplied with Shinhan Bank Korea lifetime PD.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

- B. Credit risk (continued)
- (V). Credit quality of gross Loans and advances to customers (continued)

# Incorporation of forward-looking information (continued)

The Bank applies Loan to Value ("LTV") cap of 70% and DSR floor of 1.67, which are similar to Korean rule.

The ECL was estimated based on a range of forecast economic conditions as at reporting date. The Novel Coronavirus (Covid-19) outbreak has spread across globally including Cambodia and beyond, causing disruption to business and economic activity. The impact on Gross Domestic Product ("GDP") and other key indicators will be considered when determining the severity and likelihood of downside economic scenarios that are used to estimate ECL.

# (vi). Amounts arising from ECL

# Loss allowance

The following tables show reconciliation from the opening to the closing balance of the loss allowance by class of financial instrument.

Global Network

# Shinhan Bank (Cambodia) Plc.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### С. Market risk

Market risk is the risk that changes in market prices – e.g. interest rates, foreign exchange rates and equity prices – will affect the Bank's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

#### (i). Interest rate risk

Interest rate risk refers to the volatility in net interest income as a result of changes in the levels of interest rate and shifts in the composition of the assets and liabilities. Interest rate risk is managed through close monitoring of returns on investment, market pricing and cost of funds. The potential reduction in net interest income from an unfavourable interest rate movement is regularly monitored against the risk tolerance limits set.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### C. Market risk (continued)

#### (i). Interest rate risk (continued)

As of 31 December 2021, the Bank did not have financial instruments carried at fair value. The Bank does not use derivative financial instruments such as interest rate swaps to hold its risk exposures. Accordingly, no sensitivity analysis was prepared.

# Interest rate benchmark reform

A fundamental reform of major interest rate benchmarks is being undertaken globally, including the replacement of some interbank offered rates (IBORs) with alternative nearly risk-free rates (referred to as 'IBOR reform'). The Bank has several exposure to IBORs on its financial assets instruments that will be reformed as part of this market-wide initiative. However, although sterling LIBOR and US Dollar LIBOR were planned to be discontinued by the end of 2021, consultations and possible regulatory changes are in progress. This may mean that some LIBORs continue to be published beyond that date. The Bank is in the process of amending or preparing to amend contractual terms in response to IBOR reform, and there is still uncertainty over the timing and the methods of transition in some jurisdictions that the Bank operates in.

The main risks to which the Bank is exposed as a result of IBOR reform are operational. For example, the renegotiation of loan and advance contracts through bilateral negotiation with the customers, updating of contractual terms, updating of systems that use IBOR curves and revision of operational controls related to the reform. Financial risk is predominantly limited to interest rate risk.

For existing contracts that are indexed to a LIBOR and mature after the expected cessation of the LIBOR rate, the Bank's treasury department has not yet renegotiated with the counter parties to amend the contractual terms of affected contracts and the determination of alternative rates.

The alternative reference rate for US Dollar ("US\$") LIBOR is the Secured Overnight Financing Rate (SOFR). Changes to the contractual terms of financial assets of the Bank indexed to US Dollar LIBOR to incorporate new benchmark rates are not yet completed as at 31 December 2021.

# Sensitivity analysis

Considering that other risk variables remain constant, the foreign currency revaluation sensitivity for the Bank as at reporting date is summarised as follows for the exposures in currencies that accounts for more than 5 percent of the net open positions are shown in its specific currency in the table below.

|                  | 31 Decen             | nber 2021            | 31 Decen             | nber 2020            |

#### D. Liquidity risk

'Liquidity risk' is the risk that the Bank will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk arises from mismatches in the timing and amounts of cash flows, which is inherent to the Bank's operations and investments.

# Management of liquidity risk

The Bank manages its liquidity through its Asset Liability Management Committee which is responsible for establishing the liquidity policy as well as monitoring liquidity on an ongoing basis. A Minimum Liquid Asset requirement has been established to ensure that the ratio of liquid assets to qualifying liabilities is subject to a minimum threshold at all times.

The table below summarises the Bank's assets and liabilities based on remaining contractual maturities. The expected cash flows of these assets and liabilities could vary significantly from what is shown in the table. For example, deposits from customers are not all expected to be withdrawn immediately.

| -   |   |  |                                       |                         |                         |                                   |                           |                         |                                 |

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 32. Financial risk management (continued)

#### E. **Operational risk**

The operational risk is the risk of losses arising from inadequate or failed internal processes, people or systems or from external factors. This risk is managed through established operational risk management processes, proper monitoring and reporting of the business activities by control and oversight provided by the senior Management. This includes legal, compliance, accounting and fraud risk.

The operational risk management entails the establishment of clear organizational structures, roles and control policies. Various internal control policies and measures have been implemented. These include the establishment of signing authorities, defining system parameters controls, streaming procedures and documentation ensuring compliance with regulatory and legal requirements. These are reviewed continually to address the operational risks of its banking business.

#### F. **Capital management**

#### (i). Regulatory capital

The Bank's objectives when managing capital, which is a broader concept than the "equity" on the face of the statement of financial position, are:

- To comply with the capital requirements set by the NBC;
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of the business.

The Bank's policy is to maintain a strong capital base so as to maintain market confidence and to sustain further development of the business. The impact of the level of capital on shareholders' return is also recognised and the Bank recognised the need to maintain a balance between the higher returns that might be possible with greater gearing and advantages and security afforded by a sound capital position.

#### (ii). Capital allocation

The allocation of capital between specific operations and activities is, to a large extent, driven by optimisation of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily upon the regulatory capital.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 33. Fair values of financial assets and liabilities

Financial instruments comprise financial assets, financial liabilities and off-balance sheet instruments. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The information presented herein represents the estimates of fair values as at the financial position date.

Quoted and observable market prices, where available, are used as the measure of fair values of the financial instruments. Where such quoted and observable market prices are not available, fair values are estimated based on a range of methodologies and assumptions regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors.

Fair value information for non-financial assets and liabilities are excluded as they do not fall within the scope of CIFRS 7: Financial Instruments Disclosures which requires the fair value information to be disclosed. These include investment in subsidiaries and property and equipment.

The fair value of the Bank's financial instruments such as cash and short-term funds, deposits and placements with banks and other financial institutions, deposits from customers and banks, other assets, other liabilities and short-term borrowings are not materially sensitive to shifts in market profit rate because of the limited term to maturity of these instruments. As such, the carrying value of these financial assets and liabilities at financial position date approximate their fair values.

The fair values are based on the following methodologies and assumptions:

# Deposits and placements with National Bank of Cambodia and other banks

The carrying amounts of deposits and placements with National Bank of Cambodia and other banks approximate their fair values, since these accounts consist mostly of current, savings and short-term deposits.

# Loan and advances to customers

For fixed rate loans with remaining period to maturity of less than or more than one year, the carrying amounts are generally reasonable estimates of their fair values.

### Deposits from customers and from other banks

The fair values of deposits payable on demand (current and savings accounts), or deposits with remaining maturity of less than one year are estimated to approximate their carrying amounts. The fair values of deposits with remaining maturity of more than one year are estimated based on discounted cash flows using prevailing market rates for similar deposits from banks and customers.

# Borrowings

Borrowings are not quoted in active market and their fair value approximates their carrying amount.

#### Global Network

# Shinhan Bank (Cambodia) Plc.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 33. Fair values of financial assets and liabilities (continued)

# Other financial assets and liabilities

The carrying amounts of other financial assets and liabilities are assumed to approximate their fair values as these items are not materially sensitive to the shift in market interest rates.

# Debt investments

The estimated fair values are generally based on quoted and observable market prices. Where there is no ready market in certain securities, fair values have been estimated by reference to market indicative yields or net tangible asset backing of the investee.

# Financing, advances and others

The fair value is estimated by discounting the estimated future cash flows using the prevailing market rates of financing with similar credit risks and maturities.

# Fair value hierarchy

CIFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources and unobservable inputs reflect the Bank's market assumptions. The fair value hierarchy is as follows:

- Level 1 Quoted price (unadjusted) in active markets for the identical assets or liabilities. This level includes listed equity securities and debt instruments.
- Level 2 Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3 Inputs for asset or liability that are not based on observable market data (unobservable inputs). This level includes equity instruments and debt instruments with significant unobservable components.

The Bank's financial assets and liability are not measured at fair value. As verifiable market prices are not available, market prices are not available for a significant proportion of the Bank's financial assets and liabilities, the fair values, therefore, have been based on management assumptions according to the profile of the asset and liability base. In the opinion of the management, the carrying amounts of the financial assets and liabilities included in the balance sheet are a reasonable estimation of their fair values.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 34. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements, unless otherwise indicated (Note 35).

#### Α. Basis of measurement

The financial statements have been prepared on a historical cost basis.

#### Β. Foreign currency

Transactions in foreign currencies are translated into the functional currency of at the spot exchange rates at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the year, adjusted for effective interest, impairment and payments during the year, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the year.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the spot exchange rate at the date on which the fair value is determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the spot exchange rate at the date of the transaction.

Foreign currency differences arising on translation are generally recognised in profit or loss.

#### С. Financial assets and financial liabilities

#### (i). Recognition and initial measurement

The Bank initially recognises loans and advances, borrowings and subordinated liabilities on the date on which they are originated. All other financial assets and liabilities are recognised on the date on which the Bank becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is measured initially at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue.

#### (ii). Classification

# **Financial assets**

On initial recognition, a financial asset is classified as measured at: amortised cost, FVOCI or FVTPL.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 34. Significant accounting policies (continued)

#### C. Financial assets and financial liabilities (continued)

*(ii)*. Classification

# Financial assets (continued)

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are • SPPI.

A debt instrument is measured at FVOCI only if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are SPPI.

On initial recognition of an equity investment that is not held for trading, the Bank may irrevocably elect to present subsequent changes in fair value in OCI. This election is made on an investmentby-investment basis.

All other financial assets are classified as measured at FVTPL.

In addition, on initial recognition, the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

# Business model assessment

The Bank makes an assessment of the objective of a business model in which an asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

the stated policies and objectives for the portfolio and the operation of those policies in practice. In particular, whether management's strategy focuses on earning contractual interest revenue, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of the liabilities that are funding those assets or realising cash flows through the sale of the assets:

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 34. Significant accounting policies (continued)

- C. Financial assets and financial liabilities (continued)
- *(ii)*. Classification (continued)

# Business model assessment (continued)

- how the performance of the portfolio is evaluated and reported to the Bank's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and its strategy for how those risks are managed;
- how managers of the business are compensated (e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected); and
- the frequency, volume and timing of sales in prior periods, the reasons for such sales and its expectations about future sales activity. However, information about sales activity is not considered in isolation, but as part of an overall assessment of how the Bank's stated objective for managing the financial assets is achieved and how cash flows are realised.

Financial assets that are held for trading or managed and whose performance is evaluated on a fair value basis are measured at FVTPL because they are neither held to collect contractual cash flows nor held both to collect contractual cash flows and to sell financial assets.

# Assessment of whether contractual cash flows are solely payments of principal and interest-SPPI

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin.

In assessing whether the contractual cash flows are SPPI, the Bank considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 34. Significant accounting policies (continued)

#### С. Financial assets and financial liabilities (continued)

*(ii)*. Classification (continued)

# Business model assessment (continued)

In making the assessment, the Bank considers:

- contingent events that would change the amount and timing of cash flows;
- leverage features;
- prepayment and extension terms;
- terms that limit the Bank's claim to cash flows from specified assets (e.g. non-recourse loans); and
- features that modify consideration of the time value of money (e.g. periodical reset of interest rates).

# Non-recourse loans

In some cases, loans made by the Bank that are secured by collateral of the borrower limit the Bank's claim to cash flows of the underlying collateral (non-recourse loans). The Bank applies judgment in assessing whether the non-recourse loans meet the SPPI criterion. The Bank typically considers the following information when making this judgement:

- whether the contractual arrangement specifically defines the amounts and dates of the cash payments of the loan;
- the fair value of the collateral relative to the amount of the secured financial asset;
- the ability and willingness of the borrower to make contractual payments, notwithstanding a decline in the value of collateral;
- whether the borrower is an individual or a substantive operating entity or is a special-purpose • entity;
- the Bank's risk of loss on the asset relative to a full-recourse loan;
- the extent to which the collateral represents all or a substantial portion of the borrower's assets; and
- whether the Bank will benefit from any upside from the underlying assets.

# Reclassifications

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Bank changes its business model for managing financial assets.

# Notes to the financial statements (continued) for the year ended 31 December 2021

# 34. Significant accounting policies (continued)

#### C. Financial assets and financial liabilities (continued)

(iii). Derecognition

# **Financial assets**

The Bank derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Bank neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in OCI is recognised in profit or loss.

# **Financial liabilities**

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled or expire.

# (iv). Modifications of financial assets and financial liabilities

# Financial assets

If the terms of a financial asset are modified, then the Bank evaluates whether the cash flows of the modified asset are substantially different.

If the cash flows are substantially different, then the contractual rights to cash flows from the original financial asset are deemed to have expired. In this case, the original financial asset is derecognised (see (iii)) and a new financial asset is recognised at fair value plus any eligible transaction costs. Any fees received as part of the modification are accounted for as follows:

- fees that are considered in determining the fair value of the new asset and fees that represent reimbursement of eligible transaction costs are included in the initial measurement of the asset; and
- other fees are included in profit and loss as part of the gain or loss on derecognition.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

- C. Financial assets and financial liabilities (continued)
- (iv). Modifications of financial assets and financial liabilities (continued)

### Financial assets (continued)

If cash flows are modified when the borrower is in financial difficulties, then the objective of the modification is usually to maximise recovery of the original contractual terms rather than to originate a new asset with substantially different terms. If the Bank plans to modify a financial asset in a way that would result in forgiveness of cash flows, then it first considers whether a portion of the asset should be written off before the modification takes place (see below for write-off policy). This approach impacts the result of the quantitative evaluation and means that the derecognition criteria are not usually met in such cases.

If the modification of a financial asset measured at amortised cost or FVOCI does not result in derecognition of the financial asset, then the Bank first recalculates the gross carrying amount of the financial asset using the original effective interest rate of the asset and recognises the resulting adjustment as a modification gain or loss in profit and loss. For floating-rate financial assets, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs or fees incurred and fees received as part of the modification adjust the gross carrying amount of the modified financial asset and are amortised over the remaining term of the modified financial asset.

If such a modification is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income calculated using the effective interest rate method.

### **Financial liabilities**

The Bank derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability derecognised and consideration paid is recognised in profit and loss. Consideration paid includes non-financial assets transferred, if any, and the assumption of liabilities, including the new modified financial liability.

If the modification of a financial liability is not accounted for as derecognition, then the amortised cost of the liability is recalculated by discounting the modified cash flows at the original effective interest rate and the resulting gain or loss is recognised in profit and loss. For floating-rate financial liabilities, the original effective interest rate used to calculate the modification gain or loss is adjusted to reflect current market terms at the time of the modification. Any costs and fees incurred are recognised as an adjustment to the carrying amount of the liability and amortised over the remaining term of the modified financial liability by re-computing the effective interest rate on the instrument.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (v). Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Bank has a legal right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

### (vi). Fair value measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Bank has access at that date. The fair value of a liability reflects its non-performance risk.

When one is available, the Bank measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Bank uses valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument on initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the Bank determines that the fair value on initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique for which any unobservable inputs are judged to be insignificant in relation to the measurement, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value on initial recognition and the transaction price. Subsequently, that difference is recognised in profit and loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Bank measures assets and long positions at a bid price and liabilities and short positions at an ask price.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (vi). Fair value measurement (continued)

Portfolios of financial assets and financial liabilities that are exposed to market risk and credit risk that are managed by the Bank on the basis of the net exposure to either market or credit risk are measured on the basis of a price that would be received to sell a net long position (or paid to transfer a net short position) for the particular risk exposure. Portfolio-level adjustments - e.g. bid-ask adjustment or credit risk adjustments that reflect the measurement on the basis of the net exposure - are allocated to the individual assets and liabilities on the basis of the relative risk adjustment of each of the individual instruments in the portfolio.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

The Bank recognises transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

### (vii). Impairment

The Bank recognises loss allowances for ECL on the following financial instruments that are not measured at FVTPL:

- financial assets that are debt instruments;
- financial guarantee contracts issued; and
- loan commitments issued.

No impairment loss is recognised on equity investments.

The Bank measures loss allowances at an amount equal to lifetime ECL, except for the following, for which they are measured as 12-month ECL:

- debt investment securities that are determined to have low credit risk at the reporting date; and
- other financial instruments (other than lease receivables) on which credit risk has not increased significantly since their initial recognition.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (vii). Impairment (continued)

12-month ECL are the portion of ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Financial instruments for which a 12month ECL is recognised are referred to as 'Stage 1 financial instruments'.

Life-time ECL are the ECL that result from all possible default events over the expected life of the financial instrument. Financial instruments for which a lifetime ECL is recognised but which are not credit-impaired are referred to as 'Stage 2 financial instruments'.

At each reporting date, the Bank assesses whether the credit risk of a financial instrument has increased significantly since initial recognition. When credit risk has increased significantly since initial recognition, loss allowance is measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Bank's historical experience and informed credit assessment and includes forward-looking information.

If credit risk has not increased significantly since initial recognition or if the credit quality of the financial instruments improves such that there is no longer a significant increase in credit risk since initial recognition, loss allowance is measured at an amount equal to 12-month ECLs.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Bank is exposed to credit risk.

### Determining whether credit risk has increased significantly

The Bank assesses whether credit risk has increased significantly since initial recognition at each reporting date. Determining whether an increase in credit risk is significant depends on the characteristics of the financial instrument and the borrower, and the geographical region.

The Bank considers that a significant increase in credit risk occurs no later than when an asset is more than 30 days past due for long term facilities or more than or equal to 15 days past due for short term facilities. Days past due are determined by counting the number of days since the earliest elapsed due date in respect of which full payment has not been received. Due dates are determined without considering any grace period that might be available to the borrower.

If there is evidence that there is no longer a significant increase in credit risk relative to initial recognition, then the loss allowance on an instrument returns to being measured as 12-month ECL.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (vii). Impairment (continued)

### **Definition of default**

The Bank considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Bank in full, without recourse by the Bank to actions such as realising security (if any is held); or
- the borrower is more than or equal to 90 days past due for long-term facilities or more than or equal to 30 days past due for short-term facilities on any material obligation to the Bank; or
- it is becoming probable that the borrower will restructure the asset as a result of bankruptcy due to the borrower's inability to pay its credit obligations.

### Measurement of ECL

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- financial assets that are not credit-impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Bank expects to receive);
- financial assets that are credit-impaired at the reporting date: as the difference between the • gross carrying amount and the present value of estimated future cash flows;
- undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Bank if the commitment is drawn down and the cash flows that the Bank expects to receive; and
- financial guarantee contracts: the expected payments to reimburse the holder less any • amounts that the Bank expects to recover.

### Inputs, assumptions and techniques used for estimating impairment

The key inputs into the measurement of ECL are the term structure of the following variables:

- Probability of default ("PD");
- Loss given default ("LGD"); and
- Exposure at default ("EAD").

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (vii). Impairment (continued)

### Inputs, assumptions and techniques used for estimating impairment (continued)

ECL for exposures in Stage 1 is calculated by multiplying the 12-month PD by LGD and EAD. Lifetime ECL is calculated by multiplying the lifetime PD by LGD and EAD.

The statistical model has been employed to analyse data collected and generate estimate of remaining lifetime PD of exposure and how these are expected to change as result of passage of time.

LGD is the magnitude of the likely loss if there is a default. The Bank estimates LGD parameters based on the history of recovery rates of claims against defaulted counterparties. The LGD models consider the structure, collateral, seniority of the claim, counterparty industry and recovery costs of any collateral that is integral to the financial asset. For loans secured by retail property, LTV ratios are a key parameter in determining LGD. LGD estimates are recalibrated for different economic scenarios and, for real estate lending, to reflect possible changes in property prices. They are calculated on a discounted cash flow basis using the effective interest rate as the discounting factor.

EAD represents the expected exposure in the event of a default. The Bank derives the EAD from the current exposure to the counterparty and potential changes to the current amount allowed under the contract and arising from amortisation. The EAD of a financial asset is its gross carrying amount at the time of default. For lending commitments, the EADs are potential future amounts that may be drawn under the contract, which are estimated based on historical observations and forward-looking forecasts. For some financial assets, EAD is determined by modelling the range of possible exposure outcomes at various points in time using scenario and statistical techniques.

As described above, and subject to using a maximum of a 12-month PD for Stage 1 financial assets, the Bank measures ECL considering the risk of default over the maximum contractual period (including any borrower's extension options) over which it is exposed to credit risk, even if, for credit risk management purposes, the Bank considers a longer period. The maximum contractual period extends to the date at which the Bank has the right to require repayment of an advance or terminate a loan commitment or guarantee.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (vii). Impairment (continued)

### Restructured financial assets

If the terms of a financial asset are renegotiated or modified or an existing financial asset is replaced with a new one due to financial difficulties of the borrower, then an assessment is made of whether the financial asset should be derecognised and ECL are measured as follows.

- If the expected restructuring will not result in derecognition of the existing asset, then the expected cash flows arising from the modified financial asset are included in calculating the cash shortfalls from the existing asset.
- If the expected restructuring will result in derecognition of the existing asset, then the expected fair value of the new asset is treated as the final cash flow from the existing financial asset at the time of its derecognition. This amount is included in calculating the cash shortfalls from the existing financial asset that are discounted from the expected date of derecognition to the reporting date using the original effective interest rate of the existing financial asset.

### Credit-impaired financial assets

At each reporting date, the Bank assesses whether financial assets carried at amortised cost and debt financial assets carried at FVOCI are credit-impaired (referred to as 'Stage 3 financial assets'). A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Bank on terms that the Bank would not consider otherwise;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; • or
- the disappearance of an active market for a security because of financial difficulties.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### С. Financial assets and financial liabilities (continued)

### (vii). Impairment (continued)

### Credit-impaired financial assets (continued)

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a loan that is overdue for 90 days for long term facilities or 30 days for short term facilities is considered credit-impaired even when the regulatory definition of default is different.

### Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position for financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets.

Provision for financial guarantee contracts are presented in a separate liability in the statement of financial position.

Where a financial instrument includes both a drawn and an undrawn component, and the Bank cannot identify the ECL on the loan commitment component separately from those on the drawn component: the Bank presents a combined loss allowance for both components. The combined amount is presented as a deduction from the gross carrying amount of the drawn component. Any excess of the loss allowance over the gross amount of the drawn component is presented as a provision.

### Write-off

Loans and advances are written off (either partially or in full) when there is no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. This is generally the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. This assessment is carried out at the individual asset level.

Recoveries of amounts previously written off are included in 'other income' in the statement of profit and loss and OCI.

Financial assets that are written off could still be subject to enforcement activities in order to comply with the Bank's procedures for recovery of amounts due.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### C. Financial assets and financial liabilities (continued)

### (viii). Interest rate benchmark reform

If the basis of determining the contractual cash flows of a financial asset or financial liability measured at amortised cost changes as a result of interest rate benchmark reform, then the Bank updates the effective interest rate of the financial asset or financial liability to reflect the change that is required by the reform. A change in the basis for determining the contractual cash flows is required by interest rate benchmark reform if the following conditions are met:

- the change is necessary as a direct consequence of the reform; and
- the new basis for determining the contractual cash flows is economically equivalent to the previous basis – i.e. the basis immediately before the change.

If changes are made to a financial asset or financial liability in addition to changes to the basis for determining the contractual cash flows required by interest rate benchmark reform, then the Bank first updates the effective interest rate of the financial asset or financial liability to reflect the change that is required by interest rate benchmark reform. After that, the Bank applies the policies on accounting for modifications set out above to the additional charges.

### D. Cash and cash equivalents

Cash and cash equivalents consist of cash and bank balances, demand deposits and short-term highly liquid investments with original maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value, and are used by the Bank in the management of its short-term commitments.

Cash and cash equivalents are carried at amortised cost in the statement of financial position.

### E. Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of the ordinary share are recognised as a deduction from equity, net of any tax effects. Other shares are classified as equity and/or liability according to the economic substance of the particular instrument. Distributions to holders of a financial instrument classified as an equity instrument are charged directly to equity.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### F. **Reserves and regulatory reserves**

The reserves are set up for any overall financial risk. The Board of Directors exercises its discretion for the use and maintenance of the general reserves. The transfer from retained earnings to reserves is subject to the approval by shareholders.

Regulatory reserves are set up for the variance of provision between loan impairment in accordance with CIFRS and regulatory provision in accordance with National Bank of Cambodia's Prakas No. B7-017-344 dated 1 December 2017 and Circular No. B7-018-001 Sor Ror Chor Nor dated 16 February 2018 on credit risk classification and provision on impairment for banks and financial institutions. In accordance with Article 73, the entity is shall compare the provision calculated in accordance with Article 49 to 71 and the provision calculated in accordance with Article 72, and the record:

- In case that the regulatory provision calculated in accordance with Article 72 is lower than (i) provision calculated in accordance with Article 49 to 71, the entity records the provision calculated in accordance with CIFRS: and
- (ii) In case that the regulatory provision calculated in accordance with Article 72 is higher than provision calculated in accordance with Article 49 to 71, the entity records the provision calculated in accordance with CIFRS and transfer the difference from retained earnings or accumulated loss account into regulatory reserve in shareholders' equity of the statement of the financial position.

The regulatory reserves are not an item to be included in the calculated of the Institution net worth.

On 28 December 2021, the NBC issued a new Circular, No. B7-021-2314 CL on Classification and Provisioning Requirement on Restructure Loans, which aims at phasing out the forbearance period for the existing restructured loans and phasing the classification and provisioning arrangements complying with the current regulation, Prakas No.B7-017-344 dated 01 December 2017 on Credit Risk Grading and Impairment Provisioning. In this regard, all restructured loans by 31 December 2021 shall be classified and provisioned based on the requirements under this circular. For loans that were still in the assessment period, they shall be kept at the same classification as before the restructured terms of contract.

Following the NBC's workshop on "the Circular on Classification and Provisioning Requirement for Restructured Loans" held on 18 January 2022, the NBC issued a communication on 4 February 2022 allowing banking and financial institutions ("BFIs") to defer the implementation of the new Circular until January 2022 onward though early adoption is encouraged. The Bank chose to defer the implementation of the new Circular in preparing these financial statements for the year ended 31 December 2021.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### G. Deposits and placements with banks

Deposits and placements with banks are stated at amortised cost less impairment for any uncollectable amounts.

### H. Statutory deposits

Statutory deposits included in balances with the NBC are maintained in compliance with the Cambodian Law on Banking and Financial Institutions and are determined by the defined percentage of the minimum share capital and the customers' deposits as required by NBC.

### I. Loans and advances to customers

'Loans and advances to customers' captions in the statement of financial position include loans and advances to customers measured at amortised cost; they are initially measured at fair value plus incremental direct transaction costs, and subsequently at their amortised cost using the effective interest method.

### J. Other assets

Other assets are carried at amortised cost less impairment if any.

### K. **Property and equipment**

### **Recognition and measurement** (i).

Items of property and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset and any other costs directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. The cost of self-constructed assets also includes the cost of materials and direct labour. For qualifying assets, borrowing costs are capitalised in accordance with the accounting policy on borrowing costs. Cost also may include transfers from equity of any gain or loss on qualifying cash flow hedges of foreign currency purchases of property and equipment.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### K. Property and equipment (continued)

### (i). **Recognition and measurement**

Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When significant parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

### *(ii)*. Subsequent costs

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of property and equipment and is recognised net within "other income" and "other expenses" respectively in profit or loss.

The cost of replacing a component of an item of property and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Bank, and its cost can be measured reliably. The carrying amount of the replaced component is derecognised to profit or loss. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

### (iii). Depreciation

The cost of replacing a component of an item of property and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the component will flow to the Bank, and its cost can be measured reliably. The carrying amount of the replaced component is derecognised to profit or loss. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

Depreciation is based on the cost of an asset less its residual value. Significant components of individual assets are assessed, and if a component has a useful life that is different from the remainder of that asset, then that component is depreciated separately.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Bank will obtain ownership by the end of the lease term.

Depreciation is recognised from the date that the property, plant and equipment are installed and are ready for use, or in respect of internally constructed assets, from the date that the asset is completed and ready for use.

### Global Network

### Shinhan Bank (Cambodia) Plc.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### K. Property and equipment (continued)

### (iii). Depreciation (continued)

Depreciation of property and equipment is charged to the profit or loss using the following methods and rates:

|                               | Method        | Rate      |
|-------------------------------|---------------|-----------|
| Leasehold improvements        | Straight-line | 5%        |
| Computer and office equipment | Declining     | 25%       |
| Furniture and fittings        | Declining     | 25% - 50% |
| Motor vehicles                | Declining     | 25%       |

Construction in progress, if any, is not depreciated until such time as the relevant assets are completed and put into operational use.

Depreciation methods, useful lives and residual values are reassessed at end of the reporting period and adjusted if appropriate.

### L. Intangible assets

Intangible assets, which comprise acquired computer software licenses and related costs, are stated at cost less accumulated amortisation and impairment loss. Acquired computer software licenses are capitalised on the basis of the cost incurred to acquire the specific software and bring it to use.

Intangible assets are amortised at the rate of 50% using the declining balance method.

Costs associated with the development or maintenance of computer software are recognised as expenses when incurred.

### Μ. Leases

At inception of a contract, the Bank assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for period of time in exchange for consideration.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### Μ. Leases (continued)

To assess whether a contract conveys the right to control the use of an identified asset, the Bank assesses whether:

- the contract involves the use of an identified asset this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right throughout the period of use, then the asset is not identified;
- the Bank has the right to obtain substantially all of the economic benefits from use of the asset • throughout the period of use; and
- the Bank has the right to direct the use of the asset. The Bank has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In cases where all the decisions about how and for what purpose the asset is used are predetermined, the Bank has the right to direct the use of the asset if either:
  - the Bank has the right to operate the asset; or
  - the Bank designed the asset in a way that predetermines how and for what purpose It will be used.

### Leases in which the Bank is a lessee

At commencement or on modification of a contract that contains a lease component, the Bank allocates consideration in the contract to each lease component on the basis of its relative standalone price. However, for leases of office premises the Bank has elected not to separate non-lease components and accounts for the lease and non-lease components as a single lease component.

The Bank recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### Μ. Leases (continued)

### Leases in which the Bank is a lessee (continued)

The estimated useful lives for the current period are as follows:

Building and office branches 10 years

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, to the lessee's incremental borrowing rate. Generally, the Bank uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Bank is reasonably certain to exercise. lease payments in an optional renewal period if the Bank is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Bank is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in the lease term, a change in the assessment of the option to purchase the underlying asset, a change in future lease payments arising from a change in an index or rate, or if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

### Short-term leases and leases of low-value assets

The Bank has elected not to recognise right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less and leases of low-value assets, including IT equipment. The Bank recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### N. Deposits from customers and from other banks

The fair values of deposits payable on demand (current and savings accounts), or deposits with remaining maturity of less than one year are estimated to approximate their carrying amounts. The fair values of deposits with remaining maturity of more than one year are estimated based on discounted cash flows using prevailing market rates for similar deposits from banks and customers.

### О. Borrowings

Borrowings are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at amortised cost using effective interest method.

### Ρ. **Employee benefits**

### (i). Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Bank has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

### *(ii)*. Other long-term employee benefits

The Bank's net obligation in respect of long-term employee benefits is the amount of the benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value. Remeasurements are recognised in profit and loss in the period in which they arise.

### Q. **Provisions**

Provisions are recognised in the statement of financial position when the Bank has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### R. Interest

### Effective interest rate

Interest income and expense are recognised in profit and loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

When calculating the effective interest rate for financial instruments other than purchased or originated credit-impaired assets, the Bank/the Bank estimates future cash flows considering all contractual terms of the financial instrument, but not ECL. For purchased or originated creditimpaired financial assets, a credit-adjusted effective interest rate is calculated using estimated future cash flows including ECL.

The calculation of the effective interest rate includes transaction costs and fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or financial liability.

### Amortised cost and gross carrying amount

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The 'gross carrying amount of a financial asset' is the amortised cost of a financial asset before adjusting for any expected credit loss allowance.

### Calculation of interest income and expense

The effective interest rate of a financial asset or financial liability is calculated on initial recognition of a financial asset or a financial liability. In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not creditimpaired) or to the amortised cost of the liability. The effective interest rate is revised as a result of periodic re-estimation of cash flows of floating rate instruments to reflect movements in market rates of interest. The effective interest rate is also revised for fair value hedge adjustments at the date amortisation of the hedge adjustment begins.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### R. Interest (continued)

### Calculation of interest income and expense (continued)

However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, interest income is calculated by applying the credit-adjusted effective interest rate to the amortised cost of the asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

### Presentation

Interest income calculated using the effective interest method presented in the statement of profit and loss and OCI includes interest on financial assets and financial liabilities measured at amortised cost.

Interest expense presented in the statement of profit and loss and OCI includes financial liabilities measured at amortised cost.

### S. Fee and commission

Fee and commission income and expense that are integral to the effective interest rate on a financial asset or financial liability are included in the effective interest rate.

Other fee and commission income - including account servicing fees is recognised as the related services are performed.

A contract with a customer that results in a recognised financial instrument in the Bank's financial statements may be partially in the scope of CIFRS 9 and partially in the scope of CIFRS 15. If this is the case, then the Bank first applies CIFRS 9 to separate and measure the part of the contract that is in the scope of CIFRS 9 and then applies CIFRS 15 to the residual.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### Τ. Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets, other than inventories, contract assets and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same time. An impairment loss is recognised if the carrying amount of an asset or its related cash-generating unit (CGU) exceeds its estimated recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

Impairment losses are recognised in profit and loss. Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the CGU (group of CGUs), and then to reduce the carrying amounts of the other assets in the CGU (group of CGUs) on a pro rata basis.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

### U. Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit and loss except items recognised directly in equity or in other comprehensive income.

The Bank has determined that interest and penalties related to income taxes, including uncertain tax treatments, do not meet the definition of income taxes, and therefore has accounted for them under CIAS 37 Provisions, Contingent Liabilities and Contingent Assets and has recognised the related expenses in 'other expenses'.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### U. Income tax (continued)

### (i). Current tax

Current tax comprises the expected tax payable or receivable on the taxable income for the period using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous period.

### Deferred tax *(ii)*.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

A deferred tax asset are recognised for unused tax losses and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Bank expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Differed tax assets and liabilities are offset only if certain criteria are met.

### V. **Contingent liabilities**

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is not recognised in the statements of financial position and is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 34. Significant accounting policies (continued)

### W. **Contingent assets**

Where it is not possible that there is an inflow of economic benefits, or the amount cannot be estimated reliably, the asset is not recognised in the statements of financial position and is disclosed as a contingent asset, unless the probability of inflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent assets unless the probability of inflow of economic benefits is remote.

### 35. Changes in significant accounting policies

Interest Rate Benchmark Reform – Phase 2 (Amendments to CIFRS 9, CIAS 39, CIFRS 7, CIFRS 4 and CIFRS 16) (the Phase 2 amendments) became effective on 1 January 2021.

In accordance with the exceptions permitted in the Phase 2 amendments, the Bank has elected not to restate comparatives for the prior periods to reflect the application of these amendments. There is no impact on opening equity balances as a result of retrospective application.

### 36. New standards, amendments and interpretations not yet adopted

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2021 and earlier application is permitted; however, the Bank has not early adopted the new and amended standards in preparing these financial statements.

### Deferred Tax related to Assets and Liabilities arising from a Single Transaction Α. (Amendments to CIAS 12)

The amendments narrow the scope of the initial recognition exemption to exclude transactions that give rise to equal and offsetting temporary differences - e.g. leases. The amendments apply for annual reporting periods beginning on or after 1 January 2023. For leases, the associated deferred tax asset and liabilities will need to be recognised from the beginning of the earliest comparative period presented, with any cumulative effect recognised as an adjustment to retained earnings or other components of equity at that date. For all other transactions, the amendments apply to transactions that occur after the beginning of the earliest period presented.

The Bank accounts for deferred tax on leases applying the 'integrally linked' approach, resulting in a similar outcome to the amendments, except that the deferred tax impacts are presented net in the statement of financial position. There will be no impact on retained earnings on adoption of the amendments.

### Notes to the financial statements (continued) for the year ended 31 December 2021

### 36. New standards, amendments and interpretations not yet adopted

### Β. Other standards

The following new and amended standards are not expected to have a significant impact on the financial statements.

- Onerous Contracts Cost of Fulfilling a Contract (Amendments to CIAS 37).
- COVID-19-Related Rent Concessions beyond 30 June 2021 (Amendment to CIFRS 16).
- Annual Improvements to CIFRS Standards 2018–2020.
- Property, Plant and Equipment: Proceeds before Intended Use (Amendments to CIAS 16).
- Reference to Conceptual Framework (Amendments to CIFRS 3).
- Classification of Liabilities as Current or Non-current (Amendments to CIAS 1).
- Disclosure of Accounting Policies (Amendments to CIAS 1 and CIFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to CIAS 8).

#### Schedule VII – Large exposures

The Bank has no large exposure individually exceeding 10% of the Bank's net worth as at 31 December 20201. The exposure is the higher of the outstanding loans or commitments and the authorised loans or commitments.

#### **Supplementary Financial Information (continued)** for the year ended 31 December 2021

#### Schedule VIII – Loans to related parties

The Company did not have loans to related parties as at 31 December 2021.

#### Schedule IX – Provision of credit in national currency

The Bank is required to have its loans in national currency at least 10% of the total loan portfolio based on Prakas B7-016-334 issued on 1 December 2016 which shall be fully implemented by 31 December 2021.

|  |     | 202                   | 1                              |

#### Supplementary Financial Information (continued) for the year ended 31 December 2021

#### Schedule XI – Determination of capital buffer of banks and financial institutions

The National Bank of Cambodia issued Prakas No. B7-018-068 on 22 February 2018 with the aims at:

- Strengthening capital base to settle any loss which may arise from risk of Institutions;
- Preventing the decrease of capital to that lower than minimum capital; and •
- Reducing risk deriving from relationship between financial sector and pro-cyclicality.

The Bank is required to build up capital conservation buffer 1.25% and 2.5% from 01 January 2019 and from 01 January 2020 respectively in addition to minimum tier 1 capital.

Distribution of annual profit shall be prohibited when tier 1 capital ratio (MCR1) of Institutions is under any quartile of capital conservation buffer as stipulated in article 11 of the present Prakas.

| Tier 1 Capital Ratio                | Minimum Capital Conservation Ratio (expressed as percentage of earnings) |
|-------------------------------------|--|
| ≥ MCR1 (7.5%) to (MCR1 + 0.625%)    | 100%   |
| > (MCR1 + 0.625%) to (MCR1 + 1.25%) | 80%  |
| > (MCR1 + 1.25%) to (MCR1 + 1.875%) | 60%  |
| > (MCR1 + 1.875%) to (MCR1 + 2.5%)  | 40%  |
| > (MCR1 + 2.5%)                     | 0%   |

Institutions shall prepare report as follow table of the Prakas including tier 1 capital, tier 2 capital, and risk weighted assets whose figures are the same as those in reports on solvency ratio and calculation of the Bank's net worth, on both solo and consolidated basis.

#### **Supplementary Financial Information (continued)** for the year ended 31 December 2021

#### Schedule XI – Determination of capital buffer of banks and financial institutions (continued)
